

## Schuylkill County Transportation Improvements Inventory (TII) 2009

### TII Overview:

The Transportation Improvements Inventory (TII) is a comprehensive record of known transportation needs within Schuylkill County. It includes proposed roadway, bridge, bicycle and pedestrian, freight and transit projects that have been recommended to the Schuylkill County Planning Commission by municipalities and other stakeholders over time. Although the TII listing does not represent programming or funding commitments, it recognizes transportation priorities and emphasizes the need for additional technical and financial resources to implement critical transportation improvements.

### Why Inventory the County's Transportation Needs?

- (1) To provide a single source of transportation needs and proposed transportation projects in the County.
- (2) To facilitate efficient coordination between municipalities, Schuylkill County, PennDOT, NEPA Alliance and other agencies
- (3) To track the status of projects over time
- (4) To identify potential opportunities for technical and financial resources for implementation

### Using the Inventory

**SCPC ID:** Identifies the project category and gives an identification number to each project

**MPMS #:** Multi-Modal Project Management System number is used as a PennDOT Id. A "\*" indicates that a project has multiple MPMS numbers.

**Primary Municipality:** Municipality where the most significant elements of the proposed project are located. A "+" indicates that a project is located within multiple municipalities.

**Project Name:** Name, general location and/or approximate limits of the project.

**Type of Improvement:** Basic description of the proposed type of improvement or identified need.

**Total Cost (\$000's)** Project cost estimate in thousands (\$000's) based on current year dollars from the best available sources. Estimate represents costs from all project phases, including engineering, right-of-way, and construction.

**TIP:** Programming of federal, state, and local matching transportation funds from the NEPA region's FFY 2011 Transportation Improvement Program (TIP) as adopted by the NEPA Alliance.

**Total Score:** A score based evaluation system was not used to develop the 2009 TII. Moving forward, the Schuylkill County Planning Commission staff uses an approved evaluation process to develop a total score for each project. The value determines the technical ranking of projects within a given category. A higher value represents a higher ranking.
